**MANIFESTO – HAYDN BATEMAN**

My Manifesto for the By-Election

Housing/Accommodation for local families.

By converting the old Connaught into flats, push on with construction of low cost energy efficient starter homes, on the White Gates site.

Sustainability. Move forward with green energy, solar, wind and wave power.
Encourage more Grower's look at setting up a grower's cooperative with support from the States. Set up apprenticeship schemes for school leavers.

Connectivity. We need to focus and improve our air transport connectivity and resilience.

Infrastructure. Imperative that we continue with the push to get the Runway resurfaced.
Look at introducing Treatment Plants for the Islands sewer system.

Transparency. I believe there is still room for more transparency between the States and the public.

I am not making promises, but will do my utmost to make things happen. I believe that working with the people of Alderney, goals can be achieved.

I would like to thank my proposer Simon Boreham and Brian Chambers my seconder.

Thank you voters, I look forward to your support.

Haydn.
